

2/18/26 - Dashboard edits:

- Account details and chat buttons on the dashboard are not working now
- In preview mode, you should be able to click the screen behind it to exit out of view instead of scrolling all the way to the top to exit out
- Where is the edit feature for the pictures to be able to zoom in or out and move up and down, left and right to be able to center the picture best.
- make the I have read the terms and conditions button mandatory
- I uploaded 20 pictures and only 4 show in the preview.
- The info card on the right should look like the main page
- The state is pulling New Jersey (NJ) it should only say NJ Like the ad's on the front end
- Make sure all the font is the same.. it should Look exactly like the actual listing page. Not bold font
- Proper spacing in the title, the heart and the buttons on the bottom.
- I entered only 7 yrs old and not month.. but it pulled over 7 years months - if someone only enters the year it should only say \_ years old.

- Please note what we previously had on the dashboard that is no longer there. I can't find the updated one but we had start date and a box for the start time and end date and a box for the end time.
- When you select Auction another menu should appear below to enter the auction information details . That information is what starts and ends the countdown timer. It should also black out the price and in the new auction menu it should say - Starting Bid, reserve amount (Optional) and give a link to the auction.
- Start date & Time, End date and time, Reserve amount ( if entered) and auction link should be displayed in the additional information section of the horses profile.

- Should open on a new tab and not the same tab so it doesn't take people away from the website.

**Missing Information:** Video previews - they should show up under the pictures ( with a header saying videos)

- When I went in and out of preview a few times the last time all the documents, pictures, skills/disciplines, rider level, parts of the pedigree all disappears
- The Media Feature Image I choose did not appear as the main picture
- Below - not all 20 pictures are showing on the view details.
- There is no space between the tag ( At Auction) and heart and the name. Should look like this ->
- We also had as auction link on the auction horses that was pulled from the auction information. That should be a long button above the 4 buttons on the listing page
- The state is still not transferring over I put NJ and NY came up

The mark sold button doesn't do anything and when you press Mark withdrawn it shows our pop up. If this is how it has to be then the mark sold/ withdrawn button should be 1 button again but just longer to fill the space.

The pending button was there so if someone had put a deposit on a horse or real estate and was in the process of buying it but it wasn't sold yet, it would inform other buyers that it's pending. The pending would have to show on the front end somewhere. Pending does not mean deleted .. a horse or real estate would stay on the site and be charged. The owner could unmark pending which shows the horse or real estate to be active again.. That was the original intent as to why I had it there. If this is too complicated, then just combine the sold/ withdrawn button and use the single pop up we have.

- also on the pop up Make the default check mark on sold not withdrawn. I want people to see sold first.

The screenshot shows a horse auction listing for "GYPSY VANNE" with details like "7 Years Old", "18.2 HH", and "Gelding". A modal pop-up is overlaid on the listing, titled "Please let us know whether your horse sold or if you are withdrawing it." The pop-up contains the following text and form elements:

- If **SOLD**, check "Horse Sold" and enter the sale price.
- If **withdrawing**, check "withdraw" and enter a reason.

Submitting will immediately end your ad subscription and stop future billing.

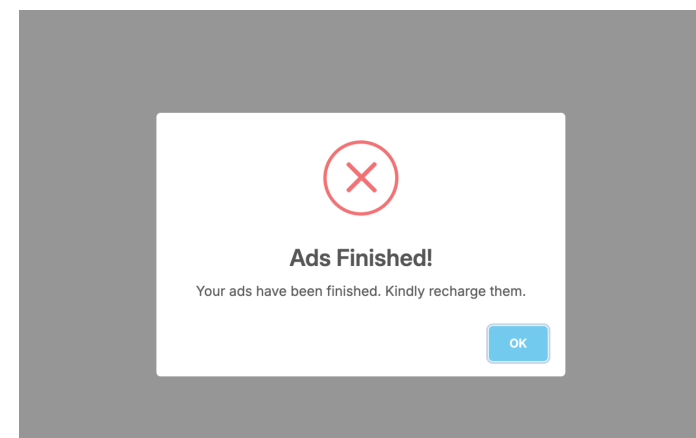

Providing a sale price allows your horse to be used as a comparable on our sales page, helping other sellers price their horses accurately. Thank you for choosing Horse Action Network!

Horse Sold  Withdraw

Withdraw Reason:  
SELECT A REASON FROM DROPDOWN

Buttons: Cancel, Submit

- I only bought 1 credit to make sure it limited the ads. This is great. The pop up should say - We're sorry! You don't have any more credits. If you would like to create more ads please click below. ( or something like that) Then give a button" Buy More Show Points" .. next to the OK button.

I just realized this is wrong. There is supposed to be the service areas covered. Add it next to the Service Locations. Someone should be able to add the areas that they work in - multiple areas - towns, counties or states that they do work in.

This is what it should look like.

- Allow only 10 service locations. It should be 2 rows of up to 5 in each row centered, if they have less it stays centered .

### Service Options

- At Provider's Facility
- Mobile (I travel to client)
- Virtual / Online Coaching

The company name that only takes up one line should have a blank line under it. That way all ads are the same size. It also gives companies with longer names the ability to wrap around to that blank line.

- Web links should show just www. NOT http:// first. The old ones didn't have that. Also if the website is too long it should just have ..... without completing it.. that way it doesn't take up 2 lines. This should ONLY be done with the website.

# REAL ESTATE

For garage - make sure it only allows 1 choice. This is to prevent people clicking multiple and making the front end messed up. This is what it looks like if you add multiple.

- Please add back car | after the number that way it separates it.

Doesnt Show video on the preview. I am confused about the preview . It doesnt look like what the real estate ad is supposed to look like. It's supposed to look like the horse ad. Also when you view details from the dash board the whole real estate page is wrong. You have it looking like a service ad. Very confused as to why it is completely Different than my approved design.
