Differences in the ads -

Preview view

- Should look just like the other Ads
- Location - Town/City, State
- Spacing of name and tag.. it should also have the same fonts.
- I would really like the preview listing to look like the actual listing on the website. With the tabs

Dashboard view

- I selected American cream Draft Horse - Dashboard says Gypsy Vanner Cross .
- should also have the town and state listed, just like the other ads.
- Show the auction link button over view details and share.. that way the ad owner can click on the link to see their horses auction ad.
- Price should be the same size as Front end Ad view

Front End Ad view

- Everything looks correct
- Were we going to change the countdown timer - you were going to give me some examples after I sent you some of mine.

Full Listing View

- Height is missing HH next to it.. Should read 16HH
- Location should match the Front end ad view - Lafayette, NJ - NOT (NJ)
- Auction countdown timer is not showing
- Spacing between AT AUCTION tab / heart is way to close to the horses name.
- Price should be the same size as Front end Ad view

SIDE NOTES:

- Countdown timer we were going to revise. Whatever it is, it needs to be the same in every view.
- for age.. it should read 1 YR (1year old) or 7 YRS (7 years old) not years spelt out. That way it matches MO for month MOS for months.

1 YEARS OLD	1 YEARS 4 MO OLD	7 YEARS OLD
-------------	------------------	-------------

We previously had year show when someone selected 1.. and years show when someone types in anything 2+

Same thing with month

Age *

- I went back to edit and I cannot delete files that were originally uploaded. They need to be able to delete to update if needed. They can upload more.

- We discussed this last night. The files should be next to each other on the same line. Do not have the boxes saying to click to view PPE. Or X-Rays. Just one note at the bottom that click to enlarge on both sections.
- All files are showing - Great!

- We discussed this last night. Add horses name to the header so it says: HorsesName's Pedigree
- Pedigree other that that works. Possible make the font a little bolder. Its very thin.

PEDIGREE
